cabinets, wardrobes, interior designs with sliding doors

cabinets, wardrobes, interior designs with sliding doors

Komandor is a successful producer of sliding door hardware for closets, wardrobes and interior design concepts. Many years of experience in designing and production of modern solutions, through our product design and engineering departments, reflect our search for quality and perfection that has placed Komandor in a leadership position.

We desire to present this catalogue to assist and inspire project designs and furnishing systems to conform to current interior design trends. Our sliding doors have a wide array of uses in various configurations: living-rooms, bedrooms, halls, foyers, basements, children's rooms, and pantries. They give a contemporary retrofit that creates an attractive accent as well as discreet back-lay that extracts the essence of the spatial character.

Presented in this catalogue, is only a small selection of arrangements that are possible with Komandor systems. The variations of profiles offered and flexibility of insert possibilities for doors, such as panels, glass, mirror, rattan, etc. gives many completion varieties.
